

Geospatial solutions for Defense and Internal security

Providing key planning and operational capabilities to the military, para-military and civil defense forces, through geospatial technology solutions

Whether in defensive, offensive, or relief and rescue efforts, timely **geospatial intelligence** aids in **effective** planning and execution.

Why IIC Technologies

Integrated Value Chain

Capabilities across value chain from surveys to development of end user applications, we offer end to end geospatial solutions around the globe.

Bridging the gap, realizing the idea

Expertise in developing detailed proof of concepts, helps bridge gap between envisioning an idea and delivery of the solution.

Hands on knowledge

We have amongst our ranks, ex-officers and technocrats from the armed forces. Their practical knowledge and expertise in military operations has helped us deliver sophisticated solutions for key defense initiatives.

Cutting edge technology

We are an active member of various global and local bodies like Open Geospatial Consortium (OGC), which define the direction of geospatial technology. We help define and follow latest standards, making our solutions 'bleeding edge' and interoperable with latest global solutions.

Skilled software professionals

Our software team has experience in developing end user applications for clients spread across the globe. Our expertise in working with multiple platforms, including open source systems has helped deliver high quality applications.

KEY SOLUTIONS

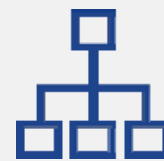

Defense mapping

- LiDAR survey
- Topographic mapping of various scale
- Littoral mapping
- Cantonment survey
- Going information
- Line of sight analysis

Defense solutions

- Command and control systems
- Simulators
- Planning systems

Defense estate management

- Defense estate GIS
- Logistics management solutions
- Natural resource management solutions
